

Cancer Center CBC & Diff Test Inactivation

Effective July 10, 2019

CANCER CENTER CBC AND DIFF TEST INACTIVATION

Effective July 10, 2019, the CANCER CENTER CBC and DIFF (CCCBCD) [85025.002] test order, will be inactivated in Epic, since it is a duplicate test to the standard CBC and DIFF.

Please note the following key points:

- The standard CBC and DIFFERENTIAL (CBCD) [85025.000] contains the same components as the CCCBCD and **should be ordered in place of** the CCCBCD.
- Smartsets and Preference lists are being updated with the standard CBCD order.
- Chemotherapy treatment plan orders will be converted to future orders beginning July 10, 2019 and will include the standard CBCD order.
- *Any CCCBCD standing orders currently in the system* will be able to be used or will expire in the system over the next year.
