Effective September 26, 2019
OBSTETRIC PANEL TEST UPDATE

Effective September 26, 2019, Wisconsin Diagnostic Laboratories (WDL) will begin offering the American Medical Association (AMA) approved Obstetric Panel with HIV. This panel combines the currently available Obstetric Panel and the HIV 1/2 Ag/Ab, 4th Generation test.

To ensure the appropriate CPT coding and billing, providers should no longer order the Obstetric Panel and HIV 1/2 Ag/Ab, 4th Generation as separate tests. Instead, please order the Obstetric Panel with HIV when HIV screening is required. The Obstetric Panel will remain available as usual and should be ordered when HIV screening is not required.

As always, we encourage providers to order individual tests when not all of the tests included in a panel are medically necessary for the individual patient.
