TOXICOLOGY TESTING UPDATE

EFFECTIVE JANUARY 29, 2020

CLOBAZAM & DESMETHYLCLOBAZAM TESTING UPDATES

Effective January 29, 2020, Wisconsin Diagnostic Laboratories (WDL) will begin in-house testing for the anti-epileptic drug Clobazam (Onfi) and its active metabolite Desmethylclobazam.

Monitoring Clobazam and Desmethylclobazam concentrations is helpful in optimizing therapy and minimizing potential drug toxicity. By performing testing at WDL, turnaround time will be reduced significantly. Our test schedule is Monday, Wednesday, and Friday, resulting in a standard turnaround time of 2 days and a maximum turnaround time of 3 days (for samples submitted Friday evening).

Specimen requirements will remain the same:

- Specimen Type: Serum
- Collection: Red-top tube (do not use SST)
- Volume: 1.0 mL serum
- Transport Temp: Room temperature
