

COAGULATION UPDATE

Effective November 10, 2020 Low Molecular Weight Heparin (LMWH) Reportable Range Update

Effective November 10, 2020, Wisconsin Diagnostic Laboratories (WDL) will be updating the reportable range for Low Molecular Weight Heparin (LMWH). The expanded range will provide numerical values up to 2.25 IU/mL. Results greater than 2.25 IU/mL will be reported as > 2.25 IU/mL.

Test	Current Reportable Range	New Reportable Range
Low Molecular Weight Heparin	0.1-1.5 IU/mL	0.1-2.25 IU/mL
