

# Molecular Testing Update

Effective May 15, 2024

## New Test: Bacterial Vaginitis, Candida Vaginosis, and Trichomonas NAAT

**Effective May 15, 2024**, Wisconsin Diagnostic Laboratories (WDL) will offer Bacterial Vaginitis, Candida Vaginosis, and Trichomonas Nucleic Acid Amplified Test (MVP NAAT; LAB6189). This assay utilizes real-time polymerase chain reaction (RT-PCR) to qualitatively test for anaerobic bacteria associated with bacterial vaginosis (*Atopobium* species, Bacterial Vaginosis-Associated Bacterium 2 (BVAB-2), and *Megasphaera*-1), *Candida* species associated with vulvovaginal candidiasis, and *Trichomonas vaginalis*. The assay is FDA approved to be performed on clinician-collected or self-collected vaginal specimens (collected in a clinical setting) from patients symptomatic for vaginitis/vaginosis.

**Acceptable Specimen:** Vaginal swab collected using the **Cepheid Xpert Swab Specimen Collection kit**.

### Test Details:

Result Component	Includes	Result Code	LOINC
Bacterial vaginosis NAAT	<i>Atopobium</i> spp., BVAB- 2, <i>Megasphaera</i> -1	12306902	69568-4
<i>Candida</i> species, excluding <i>C. glabrata/krusei</i> , NAAT	<i>C. albicans</i> , <i>C. tropicalis</i> , <i>C. parapsilosis</i> , <i>C. dubliniensis</i>	12306903	62460-1
<i>Candida glabrata/krusei</i> NAAT	<i>Candida glabrata</i> , <i>C. krusei</i>	12306904	101571-8
<i>Trichomonas vaginalis</i> NAAT	<i>Trichomonas vaginalis</i>	7000080	62461-9

**Reference Interval:** Not Detected

**CPT Code:** 0352U
