

Partnering in Patient Care: Expert Renal Pathology for Your Practice

Subspecialty Renal Pathology Services

Wisconsin Diagnostic Laboratories (WDL), in clinical partnership with the Medical College of Wisconsin (MCW) Department of Pathology, provides comprehensive renal pathology services for nephrology practices, hospitals, and health systems. Our renal pathology service combines subspecialty expertise with advanced laboratory capabilities to support the diagnosis of both routine and complex kidney disease.

Why Consult with Our Team?

Fellowship-Trained Renal Expertise: Our renal pathology service is supported by a dedicated team with advanced subspecialty training in renal pathology, ensuring timely interpretation and collaborative diagnostic expertise.

Direct Physician Access: Referring physicians have direct access to our renal pathologists for clinicopathologic discussion, preliminary result communication, and collaborative review of complex cases.

Comprehensive Biopsy Evaluation: Every kidney biopsy is evaluated using an integrated approach that combines light microscopy, immunofluorescence, and electron microscopy to provide complete diagnostic assessment.

Dedicated Client Partnership: Our team works closely with your practice to simplify renal biopsy submission, provide responsive client support, and ensure a smooth experience from specimen collection through final diagnosis.

Seamless Integration with Your Workflow

Specimen Kits

READY-TO-USE CONVENIENCE

Complimentary renal biopsy kits include all required collection and submission materials to simplify specimen preparation.

Logistics

DEPENDABLE TRANSPORTATION

Reliable courier services across Greater Milwaukee and expedited shipping for regional/national clients.

Reporting

TIMELY RESULTS DELIVERY

Preliminary findings are communicated promptly with finalized pathology reports delivered via online portal or secured fax.

Laboratory Services

Our renal pathology service provides comprehensive evaluation of native and transplant kidney biopsies using an integrated diagnostic approach. Services include:

- Primary renal biopsy interpretation
- Native kidney biopsies
- Transplant kidney biopsies
- Second opinion consultation
- Electron microscopy interpretation
- Electron microscopy-only processing
- Immunofluorescence studies

SPECIALIZED DIAGNOSTIC EXPERTISE

Our ancillary testing menu supports the evaluation of complex renal disease and complements routine biopsy interpretation. Available testing includes:

- PLA2R tissue testing
- IgG subclass analysis
- Paraffin immunofluorescence
- Congo red staining
- Immunohistochemical stains
- Immunofluorescence stains

CONSULTATIONS AND CASE REVIEWS

With an emphasis on patient centered biopsy interpretation, our concierge-level renal pathology service consists of individualized consultation for each case, accurate and actionable diagnoses, and rapid communication of preliminary results to the treating physician

Our clients have direct access to our renal pathologist by phone, text messaging, email, and/or video conference for additional follow-up or clinicopathologic discussions. In-person or virtual kidney biopsy conferences can be scheduled.

PARTNER WITH US

Whether you require primary renal biopsy interpretation, expert second opinions, or electron microscopy processing services, WDL provides flexible diagnostic solutions tailored to your practice's needs.
